

## **GREECE**

### **ATHENS EUROLYMP WEEK 2010.**

The Hellenic Dragon Class Association was reestablished three years ago and is expected to number about ten Dragons by the end of 2009. As it was mentioned in the 2008 IDA Year Book, the target of the HDCA was to create a Dragon Winter Activity Center so that the European Dragonists can sail and participate in races during the winter time. To this direction the relevant activities are being made and will be shortly concluded.

The Hellenic Sailing Federation (HSF) has really done a lot to successfully improve and promote sailing of Greek athletes within the country and internationally.

Within the scope of these activities the HSF has included in the ATHENS EUROLYMP WEEK 2010 the participation of the Dragons, so that the Dragonists can actually sail at the unique Olympic premises of Athens 2004 and practice the advantages of sailing in Athens, especially during the winter or the spring weather conditions.

Several Dragonists from Austria and Germany already consider the Athens winter “experiment” and are expected to participate at the EUROLYMP, together with those who will decide so shortly, being assured that not only our HSF but also our HDCA will provide the best facilities and hospitality.
